

# OUR AMAZING RESOURCE SMART RECORD SO FAR...

2016-2018

## WE HAVE SAVED

## CELEBRATING OUR ENERGY EFFICIENCY!

**Moolap Primary is one of the most energy efficient schools for its size.**

In the last two years we have recorded below the state benchmark of 250kwh per student per year.

This is a reason to celebrate!

We are really good at:

- Switching off lights when we leave a room
- Not turning on our heaters until we need them
- Using natural light in classrooms on sunny days
- Taking off jumpers, opening windows and turning on fans before using the AC.

This year, we are completing our **Energy Module in Resource Smart** to see if we can do EVEN better. Over the next few weeks, our Gardening Gurus and ECO Leaders will be going from classroom to classroom to monitor energy efficiency.

**KEEP UP THE GREAT WORK!**
