

This policy applies to all school events on and off site.

## RATIONALE

A balance of ultraviolet radiation (UV) exposure is important for health. Too much of the sun's UV can cause sunburn, skin and eye damage and skin cancer. Sun exposure in the first 10 years of life is a major factor in determining future skin cancer risk.

Too little UV from the sun can lead to low vitamin D levels. Vitamin D is essential for healthy bones and muscles, and for general health.

## OBJECTIVES

This SunSmart Policy has been developed to:

- Ensure all students and staff have some UV exposure for vitamin D.
- Encourage the entire school community to use a combination of sun protection measures whenever UV Index levels reach 3 and above.
- Work towards a safe school environment that provides shade for students, staff and the school community at appropriate times.
- Assist students to be responsible for their own sun protection.
- Ensure that families and new staff are informed of the school's SunSmart policy.

Staff are encouraged to access the daily local sun protection times at [sunsmart.com.au](http://sunsmart.com.au) or on the school's webpage.

The school uses a combination of sun protection measures for all outdoor activities from 01 September to the end of 30 April and whenever UV levels reach 3 and above.

## 1. SHADE

- A shade audit is conducted regularly to determine the current availability and quality of shade.
- The school council makes sure there is a sufficient number of shelters and trees providing shade in the school grounds particularly in areas where students congregate e.g. lunch and popular play areas.
- In consultation with the school council, shade provision is considered in plans for future buildings and grounds.
- Students are encouraged to use available areas of shade when outside.
- Students who do not have appropriate hats or outdoor clothing are asked to play in the shade or a suitable area protected from the sun.

## 2. CLOTHING

- Sun protective clothing is included in our school uniform. School clothing is cool, loose fitting and made of densely woven fabric. It includes polo shirts with collars and elbow length sleeves & longer style dresses and kilts.

## 3. HATS

- All students are required to wear hats that protect their face, neck and ears, i.e. legionnaire, broad brimmed or bucket hats, whenever they are outside. Baseball or peak caps and visors are not considered a suitable alternative.

## 5. SUNSCREEN

- Students must provide their own SPF 30 or higher broad spectrum, water resistant sunscreen.
- The school has available SPF 30 or higher broad spectrum, water resistant sunscreen for staff and student's use.
- Where possible, sunscreen is applied at least 20 minutes before going outdoors and reapplied every two hours if outdoors.
- Strategies are in place to remind students to apply sunscreen before going outdoors.

## Staff OHS and Role modelling

As part of OHS UV risk controls and role-modelling, when the UV is 3 and above staff:

- wear sun protective hats, clothing and sunglasses when outside
- apply SPF 30 or higher broad spectrum, water resistant sunscreen
- seek shade whenever possible

Families and visitors are encouraged to use a combination of sun protection measures (sun protective clothing and hats, sunglasses, sunscreen and shade) when participating in and attending outdoor school activities.

## Curriculum

- Programs on skin cancer prevention and vitamin D are included in the curriculum for all year levels.
- SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school homepage, parent meetings, staff meetings, school assemblies, student and teacher activities and on student enrolment.

## Review

- The school council and staff regularly monitor and review the effectiveness of the SunSmart policy (at least once every three years) and revise the policy when required by completing a policy review and membership renewal at [sunsmart.com.au](http://sunsmart.com.au).
